

# DATA: England's vaccinated population had close to one million deaths in 23 months; unvaccinated population had less than 61,000 deaths over the same period

Tags: badhealth, badmedicine, badscience, big government, Big Pharma, biological weapon, chemical violence, covid-19, Dangerous Medicine, depopulation, genocide, pandemic, pharmaceutical fraud, spike protein, truth, UK, UKHSA, unvaccinated, vaccinated, Vaccine deaths, Vaccine Holocaust, vaccine wars, vaccines, Wuhan coronavirus

Shocking data released by the U.K. government shows that over the past two years, [the vaccinated population in England has suffered an outrageous number of deaths](#) compared to the unvaccinated population, even though approximately 30 percent of the population has not even had a single dose of the Wuhan coronavirus (COVID-19) vaccine.

According to the *U.K. Health Security Agency* (UKHSA), by July 2022, 18.9 million people had refused the first dose of the COVID-19 injection, 21.5 million people had refused the second dose of the COVID-19 injection, alongside 2.6 million people who had received the first dose but refused the second, and 30.4 million people had refused the third dose of the COVID-19 injection, alongside 8.9 million people who had received the second dose but refused the third. (Related: [CAUGHT: UK hospitals certified pneumonia deaths as COVID deaths to create illusion of pandemic.](#))

According to the UKHSA's figures, 63.4 million people were eligible for vaccination at that point. Therefore, as of July 2022, 30 percent of England's population remained completely unvaccinated; 34 percent was not double vaccinated; and 50 percent was not triple vaccinated. However, the vaccinated population as a whole accounted for 95 percent of all COVID-19 deaths between January and May 2023, while the unvaccinated population accounted for just five percent.

But it's the fact that these deaths aren't among the one-dose and two-dose vaccinated population that is truly horrifying. The vast majority are among those vaccinated four times, with this population accounting for 80 percent of all COVID-19 deaths, and 83 percent of all [COVID-19 deaths among the vaccinated](#).

## The hard facts

The following figures published by the Office for National Statistics (ONS) in their "Deaths by Vaccination Status" dataset can be found on the ONS website:

Between July and September 2021, the highest number of unvaccinated all-cause deaths occurred among 70 to 79-year-olds in August with 676 deaths. Whereas, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in September 2021 with a shocking 13,294 deaths.

Between October and December 2021, the highest number of unvaccinated all-cause deaths occurred among 80 to 89-year-olds in December with 776 deaths. In contrast, the highest

ADVERTISEMENT

number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in December 2021 with a shocking 16,171 deaths.

Between January and March 2022, the highest number of unvaccinated all-cause deaths occurred among 70 to 79-year-olds in January with 776 deaths. In comparison, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in January 2022 with a shocking 15,948 deaths.

Between April and June 2022, the highest number of unvaccinated all-cause deaths occurred among 80 to 89-year-olds in April with 500 deaths. At the same time, the [highest number of vaccinated all-cause deaths](#) occurred among 80 to 89-year-olds in April 2022 with a shocking 14,902 deaths.

Between July and September 2022, the highest number of unvaccinated all-cause deaths occurred among 80 to 89-year-olds in July with 493 deaths. In comparison, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in July 2022 with a shocking 14,286 deaths.

Between October and December 2022, the highest number of unvaccinated all-cause deaths occurred among 80 to 89-year-olds in December with 604 deaths. In contrast, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in December 2022 with a shocking 19,914 deaths.

Between January and March 2023, the highest number of unvaccinated all-cause deaths occurred among 80 to 89-year-olds in January 2023 with 551 deaths. The highest number of vaccinated all-cause deaths occurred among the 80 to 89-year-olds in January 2023 with a shocking 18,297 deaths.

Between April and May 2023, the highest number of unvaccinated all-cause deaths occurred among 70 to 79-year-olds in May with 405 deaths. At the same time, the highest number of vaccinated all-cause deaths occurred among 80 to 89-year-olds in April with a shocking 13,713 deaths.

What's extremely concerning about these official figures is that the vaccinated surpass the unvaccinated by far in terms of death in every single age group since July 2021, even though 30 percent of the population have not even had a COVID-19 injection.

So much so, that there were **965,609 deaths among the vaccinated** compared to just **60,903 deaths among the unvaccinated** between July 2021 and May 2023. This means there was a total of 1,026,512 deaths in England during this period and the vaccinated accounted for 94 percent of them, whereas the unvaccinated accounted for just six percent.

This suggests that the COVID-19 injections are deadly, and proves that they are killing people.
